

Ideal for date  
and time coding

8 line capability

Washdown IP 65

Uses low cost  
ink jet ink

Cycle speeds up  
to 75 per minute

Quick disconnect  
for changeover

100% readable  
reliable codes

# GB-602-CRA PROGRAMMABLE INK JET CODEAIR SERIES TAPED BAG PRINTER

Greydon Inc. introduces the **GB602-CRA** programmable inkjet printing system designed to retrofit to taped bag loaders such as the Cryovac 8189. Codeair is a system that senses the gap in the bags and uses an air knife to separate the bags in order to expose the surface of the bag below to print on it. The system includes a pneumatic traverse with an encoder to allow the ink jet printer to lay down its message. The unit comes with a quick disconnect interface to remove the inkjet printer for changeover or washdown. The programmability allows for time and date coding when necessary as well as serialization. The GB-602 comes with all brackets and controls necessary for a quick and easy installation. The Codeair also comes in a less expensive model that is used when programmability is not necessary. The Model GC220-CRA uses the same method to separate the bag then stamps it using a wet ink printer.
